

Cefetra Ecosystem Services

IN PARTNERSHIP WITH SOIL CAPITAL

Delivering certified 3rd party audited, scope 3 eligible and SBTi aligned reductions and removals from regenerative farming practices.

Cultivating Change

One farm, one crop, one carbon molecule, at a time

The Cefetra Ecosystem Services farming programme is a comprehensive framework that financially rewards farmers for adopting sustainable practices that contribute to improvements in Greenhouse Gas reductions, soil health, water, and biodiversity. Simultaneously, the programme delivers commodities with a certified lower carbon footprint to consumers with emission reduction targets. The reductions and removals are SBTi eligible.

Beyond Carbon

Carbon is the gateway to wider nature benefits

Global Farm Score Benchmark Background

Global Farm Score

7.3 /10

| | |

BEYOND CARBON BENEFITS

SOIL
WATER
BIODIVERSITY

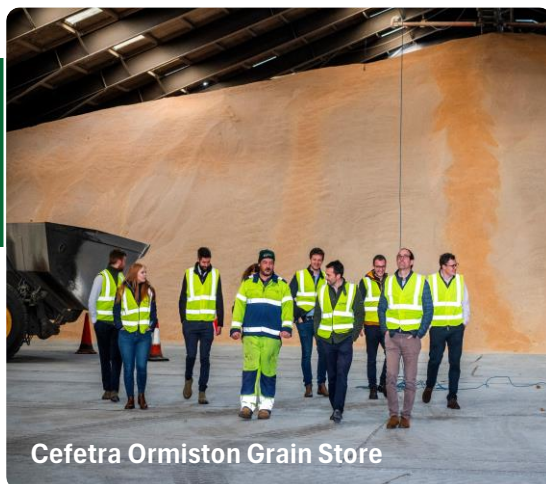

Cefetra provides “impact figures” by reporting on all the beyond carbon benefits that Cefetra farmers achieve on-farm

In partnership with Soil Capital

Combining agronomic knowledge and leading science with +100 years of supply chain expertise

The Cefetra farming program is conducted in collaboration with Soil Capital. This strategic partnership enables both parties to leverage their core competencies, delivering a farming program that is built from the agronomy angle and is commercially pragmatic.

Cefetra Ormiston Grain Store

Harvesting of Spring Linseed

Driving farm resilience with our farm suppliers

Building resilience in our supply chains

With over 7000 active suppliers, Cefetra is one of the largest agricultural merchants in the UK. Throughout our history, we have established strong relationships with farmers, enabling us to build trust and enroll farmers into our ecosystem programme. Our team of expert agronomists offers farmers support through advice and the supply agricultural inputs.

OUR PORTFOLIO OF CARBON REDUCED COMMODITIES

Wheat

Barley

Corn

Oats

Rapeseed

Beans

Co-Products

CO-PRODUCTS ACCOUNTING

Co-products that are produced from the Cefetra Ecosystem Services farming programme have a lower carbon footprint and are accounted under the latest guidance from the Value Change Initiative (VCI) – advisor to the Science Based Targets Initiative (SBTi). Soil Capital was one of the parties that commissioned the report.

Leading Science, Rigorous Certification, and Market Transparency

The farming program is designed in accordance with ISO 16064-02 standards, utilizing a combination of three key methods: soil sampling, modeling, and remote sensing, to measure reductions and removals. These results are independently audited and verified by a third-party organization.

ABOUT CEFETRA GROUP

We are Cefetra Group, global supplier of agricultural ingredients to the animal nutrition, food ingredient and energy industries. We have been working in trading and logistics since 1899. Today, our goal is to transform the vital supply chains we operate in.

One of the flagship companies within the Cefetra Group, Cefetra Ltd trades over 4.5 million tons of agricultural commodities and sources 1.5 million tons of local UK grains to serve a diverse range of customers. Currently, Cefetra Ltd, along with its sister company Cefetra Premium Crops, operates a farming program across the UK.
